Outline of Project Goals and Deliverables.

- Six Weeks Remaining At Creation of this Timeline

Week Five

- Primary Focus: Research background information.
 - Find data that is best for my project.
 - Read on similar topics
 - Identify best modeling approach

Week Six

- Primary Focus: Begin Modeling and Simulations
 - Write code to fit a model to my data
 - Write code to extend to a simulation

Week Seven

- Primary Focus: Draw Conclusions from Simulations
 - Using simulation output, extract meaningful interpretations.
 - Answer questions including: does species become extinct from predictions (and if so, when?), include plot of continued decay of species

Week Eight

- Primary Focus: Continue work with simulation
 - Check previous work.
 - Clean analyses and code
 - Consider expanding to another modeling approach and repeating simulation

Week Nine

- Primary Focus: Begin writing report
 - Construct report outline
 - Compile results
 - Begin writing body of paper

Week Ten

- Primary Focus: Finish writing report
 - Finish writing report
 - Make appropriate edits
 - Write bibliography
